Momentive Performance Materials Expands Specialty Chemicals Capability in Rayong, Thailand

Adds New Liquid Silicone Rubber (LSR) and Release Coatings Capacity

To Serve Customers in Growing Asian Markets.

Rayong, Thailand and Albany, NY – November 4, 2014 -- Momentive Performance Materials Inc. (“Momentive” or the “Company”) today commissioned two new expansions at its Rayong, Thailand manufacturing facility to serve the growing Asian market demand for specialty chemicals. Commissioning took place as part of part of the 10th anniversary celebration of the Rayong operations.

Momentive commissioned new liquid silicone rubber (LSR) production in Rayong that will serve customers throughout Asia in the automotive, aerospace, energy, healthcare and consumer products industries. Momentive is a pioneer in LSR and elastomer technology and continues to innovate and evolve to meet today's demands and needs in end products ranging from high-voltage insulators and fuel system valves to medical masks and mobile phones and portable electronics. Momentive’s Rayong operations are already an important production site for a number of the Company’s silicone and sealant product lines.

The new capabilities include full automation, state-of-the-art process controls, and a new clean room to help ensure that the highest quality standards are maintained in the production of Momentive’s LSR offerings. Momentive will continue to provide customers around the world with the advanced technology they need as well as capitalize on new market opportunities.

In addition to the LSR production, Momentive has also commissioned new release coating production capabilities in Rayong. Momentive silicone-based release coatings are applied to paper or film to produce liners that help protect the adhesive on tapes and labels prior to application. Momentive is a global leader in release coatings with a broad product offering utilized in end products ranging from thermal transfer tapes, to consumer product labels, stamps, diaper tabs, roofing shingles and industrial

tapes. The newly established capabilities in Rayong will provide Momentive with world-class capabilities to supply high growth Pacific markets.

“Our new capabilities in Rayong are a great example of how Momentive will continue to serve our customers around the world and grow our leading silicones and quartz businesses,” said Jack Boss, Momentive’s Interim Chief Executive Officer and President. “We will continue to build on our 75-year heritage of continually driving innovation across our specialty chemicals portfolio and providing customers around the globe with value-added and differentiated products and services,” added Boss.

About Momentive

Momentive Performance Materials Inc. is a global leader in silicones and advanced materials, with a 75-year heritage of being first to market with performance applications for major industries that support and improve everyday life. The Company delivers science-based solutions, by linking custom technology platforms to opportunities for customers.
